- Advanced triple eccentric design
- Designed for control and shut-off applications
- Tightness class in accordance with EN 60534-4 Class V or ASME B16-104 Class V as standard NORAM butterfly valves, are control, on/off and shut-off valves. These valves are specifically designed for concentrated sulphuric acid at elevated temperatures

The valves have an advanced triple eccentric design with a unique disc shape.

The solid seat remains un-affected by high flow velocities and temperatures. A good valve function is achieved even in difficult applications.

The NORAM valves are delivered ready for installation and operation.

The valve assemblies are delivered factory tested as complete units with actuators, positioners and accessories.
